Module 2 – Front-End Development Tools, Technologies and Frameworks

Lab Practical Manual

Unit 2 - CSS3 Essentials & Layout Techniques

Topic: Advanced CSS Properties - Solved Question

Lab 5: An HTML page that includes advanced CSS properties applied to different elements

```
<!DOCTYPE html>
<html>
<head>
    <title>Advanced CSS Properties Example</title>
    <style>
        /* Styling the body */
        body {
            font-family: Arial, sans-serif;
            margin: 0;
            padding: 0;
            background-color: #ffffe0;
            color: #333;
        }

        /* Styling the header */
        header {
            background-color: #333;
            color: #fff;
            text-align: center;
            padding: 1rem;
```

```css
}

/* Styling navigation links */
nav a {
    color: #444;
    text-decoration: none;
    padding: 0.5rem;
}

/* Styling the main content */
section {
    padding: 1rem;
}

/* Styling unordered list items */
ul li {
    list-style-type: square;
    margin-left: 1rem;
}

/* Styling the footer */
footer {
    background-color: #555;
    color: #fff;
    text-align: center;
    padding: 1rem;
}

/* Advanced CSS properties */
header h1 {
    font-size: 2.5rem;
    margin-bottom: 0.5rem;
    letter-spacing: 1px;
```

```css
    }

    section p {
        line-height: 2.6;
    }

    ul {
        border: 1px solid #ccc;
        padding: 0.5rem;
    }

    footer p {
        font-size: 0.8rem;
    }
    </style>
</head>
<body>
    <!-- Header section -->
    <header>
        <h1>CSS Properties Example</h1>
        <p>Exploring Different CSS Properties</p>
    </header>

    <!-- Navigation section -->
    <nav>
        <a href="#">Home</a> |
        <a href="#">About</a> |
        <a href="#">Services</a> |
        <a href="#">Contact</a>
    </nav>

    <!-- Main content section -->
    <section>
```

```html
        <h2>About Advanced CSS Properties</h2>
        <p>Advanced CSS properties provide finer control over the
appearance and layout of HTML elements.</p>

        <h3>Property Examples</h3>
        <ul>
            <li>This is an example of the <code>font-size</code>
property.</li>
            <li>This is an example of the <code>margin-bottom</code>
property.</li>
            <li>This is an example of the <code>letter-spacing</code>
property.</li>
            <li>This is an example of the <code>line-height</code>
property.</li>
            <li>This is an example of the <code>border</code>
property.</li>
            <li>This is an example of the <code>font-size</code> property
(footer).</li>
        </ul>
    </section>

    <!-- Footer section -->
    <footer>
        <p>&copy; 2023 Advanced CSS Properties Example. All rights
reserved.</p>
    </footer>
</body>
</html>
```

Output:

CSS Properties Example

Unsolved Question

Lab 6: Creating a complex layout for a landing page. Implement the following advanced CSS properties to achieve the desired design:

- CSS Grid to create a responsive three-column layout for the main content area.
- Apply a background image to the header section, covering the entire width and height of the viewport.
- Use CSS transitions to create a smooth hover effect on links.
- Implement a gradient background color for a section of your choice.
- Add a drop shadow to an image in the main content area.
